Subject: Microsoft settlement

I cannot believe that the DOJ wants to settle this case. You have proven beyond a shadow of a doubt that Microsoft is engaging in a monopoly to the detriment of the public and all they get is a tap (not even a slap) on the wrist. Why should the U.S. Government allow Microsoft to engage in a predatory and monopolistic manner and get away with it. This is a travesty of justice and someone should get some spine in Washington.
